Ad-Lib Work Lounge

Collaboration is seen as the key to business success today and Ad-Lib Work Lounge has been developed specifically to react to this requirement. Providing a relaxed, comfortable, seated environment, the Work Lounge design has evolved a new construction methodology that has significantly reduced the use of PU foams, resulting in a light environmental footprint for this type of product.

The development of the optional rotational foldaway table is another of the key innovations in this product.

Design by PearsonLloyd

Standard Features (*Selected models only)

- Tubular steel back frame with foam overmold and self support inner back membrane
- Molded seat foam
- Fully upholstered in a select range of fabrics
- Four star aluminum base and swivel column
- Fully upholstered height adjustable headrest*
- 2" hard wheel casters*
- Plastic based glides*

Optional Features

- Soft touch orbital fold down work surface
- 2" soft wheel casters

Performance Standards

- ANSI/BIFMA X5.4:2012
- SCS-EC10.3-2014 Indoor Air Quality

DIMENSIONS

DESIGN

PearsonLloyd

The London based practice takes a collaborative approach to its work, embracing the restrictions imposed by production, the market and all the other factors that define a brief. Their work is grounded in research and at the core is an

attempt to understand the relationship between a product, its place, and the way people use it. It is this innovative thinking that earned PearsonLloyd a Red Dot Award for the design of Ad-Lib for Senator.

Material Content

Components are constructed of the following

Recycled Content

Contains up to 25% of Recycled Material

Recyclability

The range is 100% recyclable

100%

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

-Reduce -Reuse -Recycle
